## About Me

Hello, I'm an analytically-minded Data Scientist with over a decade of experience in both model production, as well as deep-dive analysis making sense of model behavior. I prefer roles with a strong hands-on component, and prefer to lead through soft power and subject-matter-expertise as opposed to formal leadership roles. My latest passion has been experimenting with how LLMs can assist in fully-automated unsupervised learning

## Work Experience

Numerator	Data Science: Panel Science	May 2020 - Present
<ul style="list-style-type: none"><li>Designed AutoSeg, an Instant marketing segmentation modeling with LLM-in-loop processes for naming and descriptions. Reduces segmentation turnaround from weeks to days, and is valued at ~\$2.5 million / year in the first year.</li><li>Prototyped RNN-based tool to extract packaging type from images of CPGs. Quoted precision at 70% with 60-70% recall.</li><li>Designed Brand Strength Model - an SEM relating survey attitudes to actual market behaviors for individual panelists. Fully automated process valued at \$50k per engagement.</li><li>Designed Allocation V4 - distribution based model relating Projected Sales to Projected Households.</li><li>Developed numerous internal tools to assist with day-to-day DS functions<ul style="list-style-type: none"><li>Python wrapper for Insights API</li><li>Lightweight model development framework for rapid local experimentation.</li><li>Other DS tooling to improve Snowflake workflows.</li></ul></li></ul>		
Uptake	Data Science: Assessments	Mar 2019 - April 2020
<ul style="list-style-type: none"><li>Constructed machine learning models to assist manufacturing clients in diagnosing and troubleshooting common failures on assets.<ul style="list-style-type: none"><li>Anomaly detection models to capture errant behavior on stamping presses.</li><li>Rare-event prediction models to detect chock bearing and spindle failures for well-known steel manufacturer.</li><li>Unsupervised classification to clean operator labels in work-order data.</li></ul></li><li>Converted client engagements in the Mining and Manufacturing space.</li><li>Assisted in efforts to evaluate new technologies relevant to Data Science work.</li></ul>		
Avant Credit	Data Science	Jun 2016 - Mar 2019
<ul style="list-style-type: none"><li>Constructed machine learning models for the portfolio, including:<ul style="list-style-type: none"><li>Core underwriting model for prime population.</li><li>Competitor underwriting models using alternative consumer credit sources</li><li>Unsupervised segmentation model for targeted marketing.</li><li>Modeling suite to enhance refinance target logic.</li></ul></li><li>Monitored models performance for degradation, suggested remedies and rebuilds.</li><li>Built, documented, and maintained a shared automated reporting/preprocessing toolsets for the team.</li><li>Trained and informally managed new team members</li></ul>

The skill scale is from 0 (Used Once in College) to 6 (Expert). 3 implies ability to plan and complete average tasks within accurate and reasonable timelines.

Avant Credit Business Analytics Sep 2015 - June 2016

- Designed critical long-term risk forecasting tool.
  - Linear regression to turn unintuitive underwriting score into sensible 12-month risk metric
  - Custom curve-fitting optimization to map 12-month risk to marginal risk curve over life of loan.
  - Tool accurately forecast losses during a period of high risk and low access to capital.
- Performed investigative data analysis on several topics.
  - Optimal way to quantify debt to income.
  - Reverse engineering competitive products from credit report tradelines.

Enova Financial Research & Platforms Dec 2014 - Sep 2015

- Researched the efficacy of non-linear modeling strategies.
- Developed unsupervised learning model to tag call center notes on a variety of topics.
- Designed and maintained core analytics Data Mart.
- Evaluated the efficacy of voice-to-text translation software for call center.

Enova Financial UK Business Analytics Jan 2014 - Dec 2015

- Designed profit-maximizing loan amount optimization tool. Raised average loan amounts by \$60 and expected net return by 7%.
- Led all analytics efforts in major legal overhaul. Salvaged \$5 million in above worst-case scenarios.

Enova Financial CA/AU Business Analytics Aug 2010 - Jan 2014

- Identified and fixed key failures of underwriting engine.
- Created LTV calculator used to optimize digital marketing allocations.
- Informally managed team of 2-5 analysts working on different aspects of the underwriting engine.
- Identified and shut down *ad hoc* fraud pockets on the two products.

Enova Financial Fraud/Operations Analyst Jun 2008 - Aug 2010

- Developed critical reports that allowed us to open operations after massive fraud attack.
- Wrote and implemented a number of consistency checks to catch operational and development errors and report back to stakeholders.

Academic Research

Research Assistant      Granato Research Team      Sep 2006 - Sep 2007

- Prepared samples for experiments.
- Prepared preliminary findings for NSF grant proposals.

Research Assistant      CERI Research Team      May 2006 - Aug 2006

- Wrote Matlab scripts to determine theoretical surface depth from excessive loading.
- Wrote Unix shell-scripting to ETL raw GPS data into usable Matlab objects.
- Presented research to peers at 2 day conference in Oregon.

Education

University	Degree	GPA	Years
DePaul University	MS Statistics	3.9/4.0	2012 - 2015
University of Illinois - UC	BS Physics	3.6/4.0	2004 - 2008
